Subject: Dump site for stumps and limbs in Person County

Dear Mr. Fuller:

The Natural Heritage Program has no record of rare species, significant natural communities, or priority natural areas at the proposed site nor within 2 miles of the site. The Tar River lies about 2 miles to the north of the site, and a number of rare species are found in the river but several miles farther downstream. I do not believe that the proposed project would have any impact on the river.

You may wish to check the Natural Heritage Program database website at [www.ncsparks.net/nhp/search.html](http://www.ncsparks.net/nhp/search.html) for a listing of rare plants and animals and significant natural communities in the county and on the topographic quad map. Please do not hesitate to contact me at 919-715-8687 if you have questions or need further information.

Sincerely,

Harry LeGrand, Zoologist  
Natural Heritage Program
